

Solid State Relays Industrial, 2-Pole ZS Type RA2A

- 2-Pole AC Solid State Relay
- Zero switching
- For resistive and inductive AC loads
- Direct copper bonding (DCB) technology
- LED indication
- Rated operational current: 2 x 25 and 2 x 40AACrms
- Rated operational voltage: 230 - 600VACrms
- Input range: 4.5 - 32VDC
- Blocking voltage: Up to 1200Vp
- Opto-isolation: 4000VACrms

Product Description

This 2-pole industrial relay minimises the space requirements in a control cabinet without compromising performance. By applying an input voltage on control A, the corresponding output semiconductor is activated at the first zero crossing of the line voltage. The same applies to control B. LEDs indicate the control status of each pole. The optimised design is free of moulding mass to reduce internal mechanical stress. The RA2A..M types have been specially customised for demanding inductive loads.

			RA2A60D25M	RA2A60D40M

Input Specifications

Control voltage range	4.5 - 32VDC
Pick-up voltage	4.25VDC
Drop-out voltage	2VDC
Input current per pole @ max. input voltage	≤10mA
Response time pick-up @ 50 Hz	≤10ms
Response time drop-out @ 50 Hz	≤10ms

Housing Specifications

Weight	Approx. 85g
Housing material	Noryl GFN 1, black
Base plate	Aluminium, nickel-plated
25, 40A	Copper, nickel-plated
40A (M type)	
FASTON Terminal size	6.3mm

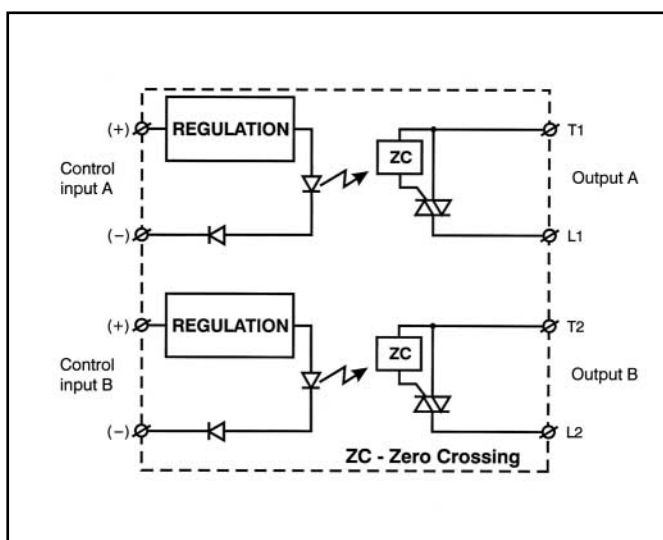

General Specifications

	RA2A23...	RA2A40...	RA2A48...	RA2A60...
Operational voltage range	24 to 265VACrms	42 to 440VACrms	42 to 530VACrms	42 to 660VACrms
Blocking voltage	650V _p	850V _p	1200V _p	1200V _p
Rated isolation input -output/output - heatsink	4kV	4kV	4kV	4kV
Operational frequency range	45 to 65Hz	45 to 65Hz	45 to 65Hz	45 to 65Hz
LED ON indication (x2)	Yes (green)	Yes (green)	Yes (green)	Yes (green)
Power factor

Infinite heatsink - No solution	---	N/A

Note: Add the currents of both poles and compare with datasheets for proper heatsink. Each pole can handle up to the maximum current specified. Example: Each pole of the RA2A23D25 can handle a maximum of 25 A.

Accessories

Heatsinks
DIN rail adapter
Varistors
Fuses

For further information refer to "General Accessories".

Applications

This relay is designed for use in applications in which it is exposed to high surge conditions. Care must be taken to ensure proper heatsinking when the relay is to be used at high sustained currents. Adequate electrical connection between relay terminals and cable must be ensured.

Thermal characteristics

The thermal design of Solid State Relays is very important.

It is essential that the user makes sure that cooling is adequate and that the maximum junction temperature of the relay is not exceeded.

If the heatsink is placed in a small closed room, control panel or the like, the power dissipation can cause the ambient temperature to rise. The heatsink is to be calculated on the basis of the ambient temperature and the increase in temperature.

Thermal resistance:
 $R_{th\ j-c}$ = junction to case

$R_{th\ c-s}$ = case to heatsink
 $R_{th\ s-a}$ = heatsink to ambient

Thermal Specifications

2 pole	0.5K/W	0.5K/W	0.46K/W
R_{th} junction to ambient	≤ 20K/W	≤ 20K/W	≤ 20K/W

Applications

A single two pole relay in a three phase application. Star and Delta (Economy switch)

A two pole relay and a single pole relay connected on a three phase application. Delta, star and star with a neutral point.
