Process Panel Controller Enhanced Migration Features - Panelicity ® Series 36
Experience the Simplicity

May 2024 , Webster NY - Panelicity® is a 1/2 DIN panel controller from Classic Automation. This powerful controller in a small package features four different pre-defined operator displays, alarms, trends, and standard industrial control strategy templates. It simplifies new installations and provides a migration path for upgrades of older, obsolete panel controllers. In addition to the Moore 352/353 and MOD 30ML. Two new upgrade control displays have been added. These are Fischer & Porter 53MC5/53SL6 and Bailey CLC/SLC controllers. Benefits include easy installation, configuration, intuitive menu options, small footprint, and low total cost, especially when migrating obsolete panel controllers.

"Panelicity simplifies controlling up to four temperature, pressure, flow or level control loops through easy configuration, installation and operation", says Fritz Ruebeck, CEO of Classic Automation LLC. "The newly added migration controller options simplify the upgrade of even more existing panel controllers".
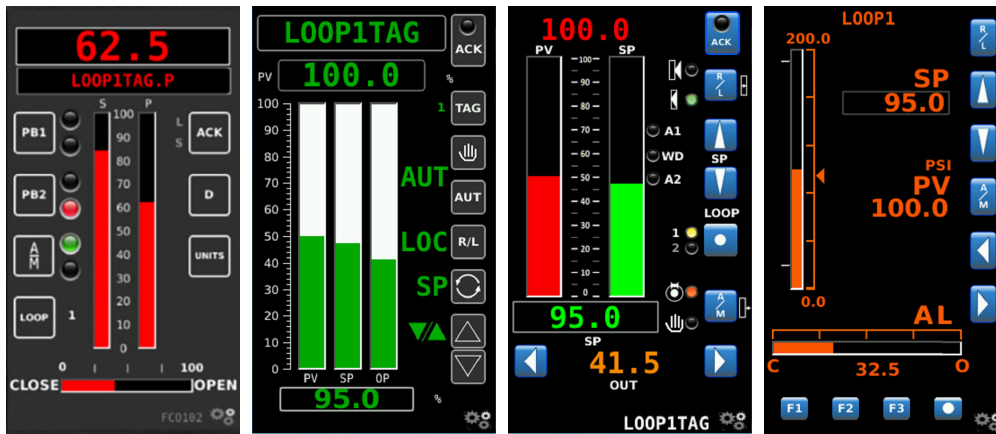

About Classic Automation LLC
Classic Automation provides automation products and services to over 150 countries and territories around the world. We help keep the world's production running.
